Additional installation at \$120 per hour
SKU# 128699574

What do I need to do?

Please clear a path for large items to be installed. Remove fragile items surrounding the area and provide adequate floor protection.

What can I expect to take place during the installation?

The installation technicians will conduct a pre-installation walk through at the designated premises. Prior to commencing installation, you or an adult you authorize will need to approve the installation plan, including wire routing and location of equipment.

The Installers will determine the type of wall outlets and covers to use in the installation. This may vary based on the installation design or type. A wall box may or may not be used in the installation.

Upon completion of the physical installation the installation technicians will review the installation. You or an adult you authorize will need to approve the installation.

Will there be any additional charges beyond the delivery and/or installation charges?

The installers will provide a written estimate to you prior to performing the work that requires additional charges. Examples of services requiring additional charges include:

- 1) Installations that require drilling through non-sheetrock/drywall interior walls, such as masonry, plaster or concrete walls.
- 2) Installations involving non-wood flooring (marble, concrete, tile, etc) and/or floor covering modifications.
- 3) Installations involving custom-built home entertainment cabinet.
- 4) Installations involving running wires in an area with inadequate access to the wall where wiring is to be hidden. (example: no basement or attic access to hide the wires.)
- 5) Installations involving running wire through anything other than normal residential wood stud walls, such as commercial or metal studs.
- 6) Moving the video source/audio source (Cable, Satellite or outside antenna) to the same wall as the video/audio component to be installed.
- 7) Outside walls with heavy insulation may require extra charges if unable to "fish" wire through outside/heavily insulated walls.
- 8) Moving of furniture and/or furniture assembly.
- 9) Multi-room installations unless specified on original ticket.
- 10) Installations in rooms larger than 20' by 20'.

The installation prices include labor and speaker wire only. Items like video cables and accessories are not included. If additional cables or accessories are suggested, go ahead and buy them. They may be returned for a refund if not needed to complete the installation.

Are there any limitations of services?

The services may require drilling in walls, securing wiring to baseboards and similar alterations. Neither Pieratt's Inc nor any subcontractor is responsible for any property damage relating to the incidental alterations necessary to provide the services. Rented or leased residences are limited to non-drilling installation with out written consent from owner/manager.

What is the warranty on the installation?

Your installation is guaranteed for 90 days after completion. If you have any questions after your installation call (859) 269-6500.
